

Holland Wildflower Farm brokers with many native seed producers and warehouses. We source the seed for your project based on the \*good information we receive from you so we can find and reserve the seed for your mixes. For this reason the following guidelines will help us help you get the right quality seed that has been tested for purity and germination.

\*Good information YOU SUPPLY on QUOTE REQUESTS (put in subject line of email)

- Timetable for the actual seeding. We will make one quote for each project so we will source available seed based on the actual time it will be purchased. If you are getting quotes for projects that you may or may not use we can help with ballpark quotes based on total quantity needed.
- Location of planting, general geographic location
- Size of seeding area (sq feet or sq meters, or acres)
- **Attach original seed project specifications** with stated percentages or specified quantities per pound. We will find the ones available for your APPROVAL. There is no charge for us to find the seed and let you know what we can provide. If you do not approve the seeds mix proposed within 7 days, we will end the process without reserving seed or quoting the mix. If it is approved, the final mix and proportions can then be determined and quoted.
- **If you send a wish list of species without quantities** or percentages, we can formulate a mix with the recommended ratios for a group of available seeds for your APPROVAL. If you do not approve the mix within 7 days, we will end the process without reserving or quoting the mix. If it is approved, the final mix and proportions can then be determined and quoted.
- The quote will include the price per bulk lb. unless PLS (Pure Live Seed) lbs. requested, the total quantity of seed mix requested (custom mixes require a 10 lb minimum). The quote is for the seed and mixing and packaging.
- The price quote is good for 30 days, and *seed is reserved for one week* after the quote is submitted. Our warehouses will only reserve seed for short periods without an order. We will not submit more than one quote per project request. This is why the timeline for planting date is important.
- Actual shipping charges will be billed separately after the order has been placed. The seed will come from the nearest storage warehouse in one of about 11 states where native seeds are produced, commercially harvested, and stored. Shipping costs can be calculated once the order is placed, based on where the seed is coming from.
- 

\*Good information we need for your ORDER REQUESTS (put in the subject line of email)

1. Account information: name of company and/or party responsible for the purchase, \*\*shipping address, email address and phone number, billing address, for business or nonprofits include accounts payable contact, with email (where invoice will be sent) and phone number. \*\*this is where the seed will be delivered
2. Payment information: All custom orders are prepaid only. We will email invoices which can be paid online with any credit card. Orders under \$300 can be paid with any credit card online. All invoices over

\$300 must be paid via ACH transfer which can be set up when you go to the payment options on the invoice OR send checks to Holland Wildflower Farm, 290 Oneal Ln, Elkins AR 72727. Shipping will be billed by separate invoice after the seed has been shipped.

3. Specify delivery date, and once that is determined, we will go into action to meet your needs.

All seed is tested, accurately labeled, mixed and measured carefully, then shipped directly to you. All sales are final. Please see all terms and conditions <https://hollandwildflowerfarm.com/terms-and-conditions/>
